The Buller District Council provides for Community Grants funding, subject to yearly provision within its Annual Plan/Long Term Plan.

Council's Community Grants funding is available to support community groups and organizations operating in the Buller District to contribute to achieving Council's Community Outcomes.

All decisions on grant allocations are the delegated responsibility of the Community, Environment, and Services Committee.

The Community, Environment, and Services Committee shall, when considering applications, base funding decisions on project's alignment with Council's Community Outcomes.

The project or funding use needs to support at least one Community Outcome. The Community Grants is not available to individuals, will not be made retrospectively, and a community group or organisation can only apply once per financial year.
